## Technical Data Sheet- Leather Finishing Products

Product Code: DT-1169

### DESCRIPTION

A high performance resonated duller based on a unique polyurethane co-polymer technology suitable for use in automotive leather topcoats.

### APPLICATIONS

Used in automotive leather topcoats as the primary resonated duller to provide a variety of degrees of dulling and performance properties.

### FEATURES

- Fine particle size Imparts smooth surface feel
- High efficiency for excellent gloss control
- Can be used in one machine pass operations
- Can be embossed as a final step with good grain and surface feel properties

### PROPERTIES

Percent Solids, weight	30
Specific Gravity, 25°C	1.05g/cm <sup>3</sup>
pH, typical value	8.5
Viscosity, cPs	230

### STORAGE

Store in a cool, dry place, preferably less than 80°F, to ensure a useful shelf life of eighteen months. Protect from freezing.

Quaker Color manufactures all its products under carefully controlled conditions to meet rigid specifications. The values given in this publication are typical values intended as guidelines for the use of the products, they are not specifications. It is the user's responsibility to thoroughly test the product in their particular application to determine its performance, efficacy and safety. Should you require the actual specifications currently enforced on specific products contact your Quaker Color representative for the appropriate information.
