Technical Data Sheet- Leather Finishing Products

Product Code: AM-71

DESCRIPTION

AM-71 is an alkali, swellable, thixotropic type of thickener for viscosity control of all types of leather coatings.

APPLICATIONS

Used in leather base coat or topcoat applications at levels from 1-3% to increase viscosity and enhance the rheology properties of the coating.

FEATURES

- Easily incorporated into finishing mix
- Minimizes pigment flocculation and color drift
- Best suited for spray applications
- Lowers gloss of topcoats

PROPERTIES

Percent Solids, weight	15
Specific Gravity, 25°C	1.0
pH, typical value	4
Viscosity, cPs	5

STORAGE

Store in a cool, dry place, preferably less than 80°F, to ensure a useful shelf life of eighteen months. Protect from freezing.

Quaker Color manufactures all its products under carefully controlled conditions to meet rigid specifications. The values given in this publication are typical values intended as guidelines for the use of the products, they are not specifications. It is the user's responsibility to thoroughly test the product in their particular application to determine its performance, efficacy and safety. Should you require the actual specifications currently enforced on specific products contact your Quaker Color representative for the appropriate information.
