A Step Ahead…

Technical Data Sheet- Leather Finishing Products

Product Code: DM-831

DESCRIPTION

DM-831is a unique medium soft, inherently dull, co-solvent free, high performance aliphatic polyether polyurethane dispersion.

APPLICATIONS

Leather base coats, intermediate coats and leather topcoat applications where good flexibility, soft hand feel and lower gloss properties are required.

FEATURES

- Excellent aesthetics soft touch films
- Inherently dull- low gloss
- Good flexing resistance
- Good foaming properties
- Minimizes necessity for external dulling agents

PROPERTIES

Percent Solids, weight	33
Specific Gravity, 25°C	1.04
pH, typical value	8.5
Viscosity, cPs	200

STORAGE

Store in a cool, dry place, preferably less than 80°F, to ensure a useful shelf life of eighteen months. Protect from freezing.

Quaker Color manufactures all its products under carefully controlled conditions to meet rigid specifications. The values given in this publication are typical values intended as guidelines for the use of the products, they are not specifications. It is the user's responsibility to thoroughly test the product in their particular application to determine its performance, efficacy and safety. Should you require the actual specifications currently enforced on specific products contact your Quaker Color representative for the appropriate information.
