Technical Data Sheet- Leather Finishing Products

Product Code: FS-1606 Additive

DESCRIPTION

FS-1606 Additive is a specialty engineered formulated leather flesh side resin product designed to minimize and control aldehyde and VOC emissions in accordance with the updated Global regulations.

APPLICATIONS

Intended to be used as a stand-alone product applied by roll or spray application on the flesh side of the leather. Application range should be ~5-7g/ft^2 wet.

FEATURES

- Ready to Use Formulated Product
- Reduction of Aldehyde Emissions
- Reduction of VOC Emissions
- Soft, Non-Tack
- Eliminates Fiber Pull Through on Perforated Leathers

PROPERTIES

Percent Solids, weight	15-20%
pH, typical value	6.0-9.0
Viscosity, cP	<100

STORAGE

Store in a cool, dry place, preferably less than 80°F, to ensure a useful shelf life of twelve months. Protect from freezing.

Quaker Color manufactures all its products under carefully controlled conditions to meet rigid specifications. The values given in this publication are typical values intended as guidelines for the use of the products, they are not specifications. It is the user's responsibility to thoroughly test the product in their particular application to determine its performance, efficacy and safety. Should you require the actual specifications currently enforced on specific products contact your Quaker Color representative for the appropriate information.
